### ***What is the Art of Participatory Leadership?***

The Art of Participatory Leadership is a highly effective way of harnessing collective wisdom and the self-organizing capacity of teams of any size. Based on the assumption that people give their effort and lend their resources to what matters most to them – in work as in life – the Art of Participatory Leadership blends a combination of powerful strategic conversational processes to invite people to step in and take charge of the challenges facing them.

*“I very much liked the atmosphere, quality and connection between participants. We all co-created this reality but the role of hosts and the way they were keeping space was crucial and extremely well done. This was the most important condition for success! Also, I appreciated the way all the tools were explored, by application to real cases, and giving space to initiative. The agility of the whole event: the way of hosting those who wanted to offer or bring something to the group was a big discovery for me!”*
