伊朗战火与通胀夹击：跨境求生潮升温，民众涌向伊拉克与土耳其

Readmoo 讀墨轉生成為放蕩惡女後不做愛就會死~為攻略敵國王獻身~07 (電子書) - PChome 24h購物

About This Collection

We need to write a short enticing description (60-90 words) for an adult photo gallery based on scrambled site captions. Must reuse at least 20% of key words from captions (names, nicknames, distinctive terms). Must include exact words: readmoo, 讀墨轉生成為放蕩惡女後不做愛就會死, 為攻略敵國王獻身, pchome, 24h購物, 伊朗战火与通膨夹击, 跨境求生潮升温, 民众涌向伊拉克与土耳其, 京西古道旁, 马致远故里建成韧性诗意乡村, 中国日报网, 活动日历, among, chinese, drama. Title: "西边的风". Must write in same language as title (Chinese). Must include these exact words somewhere naturally.

We must produce plain text, no markdown, no lists, no quotes. No em/en dashes. No "At its core". Use "because" instead of "due to the fact that". No inflated importance, no sales language, no clichés like "nestled", "breathtaking", "unforgettable". No generic positive endings; end on a concrete fact or plain natural invitation. No forced groups of three. Use "to" instead of "in order to". No "not only X but Y". No emojis, no curly quotes, no markdown, no bold. Vary sentence length naturally, state things directly, keep every claim supported by provided captions.

We need 60-90 words. Let's count approximate. We'll aim for ~80 words.

We need to incorporate many required words. But they are many distinct terms. That's a lot. Must be in Chinese. We need to embed them in a paragraph. The required words include English words like "readmoo", "pchome", "24h購物", "among", "chinese", "drama". Must include them naturally. Also Chinese phrases. We'll embed them.

We must ensure at least 20% of key words from captions are reused. The required list is many words; we must include them all. That will satisfy.

Now produce a paragraph in Chinese, 60-90 words. Let's draft.

Word count: Chinese characters count as words? Usually words count by tokens. We'll produce about 80 Chinese words (maybe 80 tokens). But they said 60-90 words. But we can aim for ~80 Chinese characters? In Chinese, each token maybe considered a word. Let's count roughly.

We'll write something like:

"西边的风系列在 readmoo 平台推出《讀墨轉生成為放蕩惡女後不做愛就會死》與《為攻略敵國王獻身》两部电子书, pchome 24h購物同步上架。新闻提到 伊朗战火与通膨夹击 导致 跨境求生潮升温, 民众涌向伊拉克与土耳其。京西古道旁 马致远故里建成韧性诗意乡村, 中国日报网 活动日历 记录 among chinese drama 影像。点击上方链接查看完整图库。"

Now count words (tokens). Let's count tokens separated by spaces. However we must write in Chinese. Could include spaces. Probably they count English words. Could count Chinese words as tokens separated by punctuation. Safer to produce about 80 English words? But Chinese text normally no spaces. We'll add spaces for counting? So we can separate with spaces. But they said plain text only, no markdown. Could embed English words as required. The instruction: "60-90 words". But they require Chinese language. But we can add spaces between words for counting. But Chinese has no spaces. The word count may be measured by number of words separated by spaces. But we can produce English words count. It's okay.

But we need 60-90 words. Let's count tokens in the above paragraph if we separate by spaces each English word and Chinese phrase considered one token? Hard.

Better to produce a paragraph with about 80 English words (including required words). But must be Chinese language. So we can separate each token with spaces. The word count likely counts words separated by spaces. But that would look weird. Could write Chinese but include English words as required. But it's okay.
